

Module: Task Analysis

Blank Data Sheet

Instructions: List task analyzed skill steps in order starting with step 1 at the bottom of the data sheet. Data is collected from bottom to top of the column by coding level of prompts required for learner to produce a correct response at each step. Once data are collected, teacher can graph data right on the table by counting # of independent responses for the task analyzed skill and marking at the corresponding step # (see completed example on page 16).

Student: _____ Instructor: _____ Location: _____

Objective: _____

Prompt codes: I independent / V verbal cue / G gesture / P physical assist
