

## Embedding Natural Intervention within Daily Activities

Daily Activity/ Routine	Goal 1. Using 2-3 word utterances to request	Goal 2. Labeling body parts
Coat Hook Routine	<p>Activity: Adults can forget to bring necessary items (shoes to replace his boots) to assist student.</p> <p>Intervention: Use modified time delay and mands to encourage request.</p> <ul style="list-style-type: none"> <li>• Wait (modified time delay) to see if Brian requests his shoes independently.</li> <li>• If not, provide a mand: "Tell me what you need, Brian," in order to prompt for the response: "my shoes."</li> </ul>	<p>Activity: Removing coat, etc in the morning.</p> <p>Intervention: Use mands (commands/prompts) and time delay to elicit labels for body parts associated with clothing items.</p> <ul style="list-style-type: none"> <li>• Adult asks, "Are these your hands or feet?" as Brian removes his mittens. Daily Activity/ Routine	Goal 1. Using 2-3 word utterances to request	Goal 2. Labeling body parts
Morning Snack	<p>Activity: Offered choices at snack time are kept out of reach but in sight.</p> <p>Intervention: Adult uses mand to elicit request. Models two-word utterances when response is a single word utterance.
